Contents of Volume 66

Number 1, 7 May 1977

YAGER, P., A Novel Mechanism for the Na^+–K^+ ATPase . . 1

MIZUHASHI, S., Out-of-plane Distortion of the Iron in Ferrohemoglobin Due to Pseudo-Jahn-Teller Effect 13

SHARPE, P. J. H., CURRY, G. L., DE MICHELE, D. W. and COLE, C. L., Distribution Model of Organism Development Times . . 21

SANYAL, N. K., KUMAR, U. and SINHA, R. P., Energy of Association of Uracil with Watson–Crik A–T Pair 39

CRIPPEN, G. M. and KUNTZ, I. D., Directional Structural Features of Globular Proteins 47

HUDSON, H. M. and HAHN, G. M., The Labelled Mitosis Curve for a Population Consisting of Fast and Slowly Cycling Cells . . 63

WELLS, B. D., PARKS, L. A., TAM, I. and FISHER, J. R., A Kinetic Model for Glutamate Dehydrogenase 81

MOORE, G. W., Proof of the Populous Path Algorithm for Missing Mutations in Parsimony Trees 95

MARSHALL, E. A., The Osmotic Flow of an Electrolyte Through a Charged Porous Membrane 107

DUCHESNE, J., A Unifying Biochemical Theory of Cancer, Senescence and Maximal Life Span 137

RUCKENSTEIN, E., MARMUR, A. and GILL, W. N., Growth Kinetics of Platelet Thrombi 147

ALLEN, T. F. H., Neolithic Urban Primacy: The Case Against the Invention of Agriculture. 169

WOLKOWSKI, Z. W., MOCCATTI, D., HEYMANS, F. and GODFROID, J-J., A Quantitative Structure-activity Approach to Chemoreception: Importance of Lipophilic Properties. 181

LETTERS TO THE EDITOR

CIURES, A., The Mach Bands: The Visualization of Gibbs Phenomenon in the Space Domain 195

FONG, F. K., Current Developments in the Investigation of the Primary Light Reactions in Photosynthesis 199

Number 2, 21 May 1977

NELSON, J. I., The Plasticity of Correspondence: After-effects, Illusions and Horopter Shifts in Depth Perception 203

BRANCHEY, M., MEISNER, M. and SIMPSON, G. M., A Paradox in the Prognosis of Schizophrenia. Explanation by a Mathematical Model 267

BLACK, J. A. and HARKINS, R. N., Amino Acid Compositions and Evolutionary Relationships with Protein Families . . . 287

LEIBEL, R. L., A Biologic Radar System for the Assessment of Body Mass. The Model of a Geometry Sensitive Endocrine System is Presented 297

BLOMBERG, C., A Kinetic Recognition Process for tRNA at the Ribosome 307

TULJAPURKAR, S. D. and SEMURA, J. S., Dynamic Equilibrium Under Periodic Perturbations in Simple Ecosystem Models . . . 327

WU, L. S-Y., The Stability of Ecosystems—A Finite-Time Approach . 345

RANSOM, R., Computer Analysis of Cell Division in *Drosophila* Imaginal Discs: Model Revision and Extension to Simulate Leg Disc Growth 361

DAVYDOV, A. S., Solitons and Energy Transfer Along Protein Molecules 379

ROTENBERG, M., Selective Synchrony of Cells of Differing Cycle Times 389

Number 3, 7 June 1977

GRISELL, R. D., Models of Potassium Conduction in Excitable Membrane Examined by Spectral Analysis 399

LAING, R., Automation Models of Reproduction by Self-inspection . 437

VENER, K. J., Urea and Sickle Cell Anemia 457

HOBZA, P. and ZAHRADNÍK, R., Electronic Structure of Established and Potential Oxidizing Agents in Biological Systems . . 461

GO, N. and ANAN, Y., Regulatory Functions of Allosteric Enzymes in Far-from-Equilibrium Systems 475

SIMON, Z., BADILESCU, I. and RACOVITAN, T., Mapping of Dihydrofolate-reductase Receptor Site by Correlation with Minimal Topological (Steric) Differences 485

RAPP, P. E. and BERRIDGE, M. J., Oscillations in Calcium-Cyclic AMP Control Loops Form the Basis of Pacemaker Activity and Other High Frequency Biological Rhythms 497

RAMAMOORTHY, S. and LEPPARD, G. G., Fibrillar Pectin and Contact Cation Exchange at the Root Surface 527

CHARNOV, E. L., An Elementary Treatment of the Genetical Theory of Kin-selection. 541

CAMERON, W. H., A Model Framework for Computer Simulation of Overall Renal Function 551

COLLINS, J. and ENGBERG, J., A Model for Switching on Ribosomal RNA Synthesis by Creating a Palindromic DNA Sequence in the Promoter Region of the Ribosomal RNA Cistron: the "Structon" 573

JUNIPER, B. E., Some Speculations on the Possible Roles of the Plasmodesmata in the Control of Differentiation 583

LETTER TO THE EDITOR

GUNTHER, B., Body Temperature: Thermodynamics of Homeothermism. Conjectural Effects of High Altitudes . . . 593

Number 4, 21 June 1977

KROOTH, R. S., MAY, S. R. and STERM, H. J., A Theory for the Chemical Mediation of the Excitability of the Brain, with Special Reference to Natural and Drug-induced Sleep 595

DARVEY, I. G., One Substrate–One Product Enzyme Reactions: The Determination of the Velocity Constants for an Enzyme Mechanism Involving Two Conformational Forms of Enzyme and One Enzyme Intermediate 655

FRISCH, H. L. and GOTHAM III, I. J., On Periodic Algal Cyclostat Populations 667

BENHAM, C. J. and KOZAK, J. J., Denaturation: An Example of a Catastrophe. III. Phase Diagrams for Multistate Transformations 681

ANNINOS, P. A. and CYRULNIK, R., A Neural Net Model for Epilepsy 697

ZNOJIL, V. and VACHA, J., A Theoretical Model of the Red Cell Survival Followed by Means of Random and Cohort Labeling 713

DUNCAN, R. and PRATTEN, M. K., Membrane Economics in Endocytic Systems 729

HARTUNG, J., An Implication About Human Mating Systems . . 739

OOSAWA, F. and NAKAOKA, Y., Behaviour of Micro-organisms as Particles with Internal State Variables 749

CLAY, J. R. and SHLESINGER, M. F., Unified Theory of $1/f$ and Conductance Noise in Nerve Membrane 765

WEI, J. and RUSS, M. B., Convection and Diffusion in Tissues and Tissue Cultures 777

PURVES, R. D., The Release of Drugs from Iontophoretic Pipettes . 791

EISEN, M. and SCHILLER, J., Microfluorometry Analysis . . . 801

LETTER TO THE EDITOR

CHIDICHIMO, G., LELJ, F. and RUSSO, N., CNDO/2 Conformational Analysis of Acetylselenocholine 813

Index to Volume 66

Acetylselenocholine, CNPO/2 conformational analysis of (letter), 813
Agriculture, invention of, Neolithic urban primacy: The case against the, 169
Algal cyclostat populations, on periodic, 667
ALLEN, T. F. H., Neolithic urban primacy: The case against the invention of agriculture, 169
Allosteric enzymes in far-from-equilibrium systems, regulatory functions of, 475
Amino acid compositions and evolutionary relationships with protein families, 287
AMP control loops form the basis of pacemaker activity and other high frequency biological rhythms, oscillations in calcium-cyclic, 497
ANAN, Y. (see GO, N.), 475
Anemia, urea and sickle cell, 457
ANNINOS, P. A. and CYRULNIK, R. A neural net model for epilepsy, 697
ATPase, a novel mechanism for the Na^+-K^+, 1
Automation models of reproduction by self-inspection, 437

BADILESCU, I. (see SIMON, Z.), 485
Behaviour of micro-organisms as particles with internal state variables, 749
BENHAM, C. J. and KOZAK, J. J., Denaturation: An example of a catastophe III. Phase diagrams for multistate transformation, 681
BERRIDGE, M. J. (see RAPP, P. E.), 497
Biologic radar system for the assessment of body mass. The model of a geometry sensitive endocrine system is presented, 297
BLACK, J. A. and HARKINS, R. N., Amino acid compositions and evolutionary relationships with protein families, 297
BLOMBERG, C., A kinetic recognition process for tRNA at the ribosome, 307
Body mass, a biological radar system for the assessment of. The model of a geometry sensitive endocrine system is presented, 297
Body Temperature: Thermodynamics of homeothermism. Conjectural effects of high altitudes, 593
Brain, a theory for the chemical mediation of the excitability of, with special reference to natural and drug-induced sleep, 595
BRANCHEY, M., MEISNER, M. and SIMPSON, G. M., A paradox in the prognosis of schizophrenia: Explanation by a mathematical model, 267

CAMERON, W. M., A model framework for computer simulation of overall renal function, 551
Cancer, senescence, maximal life span; a unifying biochemical theory of, 137
Cells of differing cycle times, selective synchrony of, 389
CHARNOV, E. L., An elementary treatment of the genetical theory of kin-selection, 541
Chemoreception, a quantitative structure-activity approach to: Importance of lipophilic properties, 181
CHIDICHIMO, G., LELJ, F. and RUSSO, N., CNDO/2 Conformational analysis of acetylselenocholine (letter), 813
CIURES, A., The Mach bands: The visualization of Gibbs phenomenon in the space domain (letter), 195

CLAY, J. R. and SHLESINGER, M. F., Unified theory of $1/f$ and conductance noise in nerve membrane, 765
CNDO/2 conformational analysis of acetylselenocholine (letter), 813
COLE, C. L. (see SHARPE, P. J. H.), 21
COLLINS, J. and ENGBERG, J., A model for switching on ribosmal RNA synthesis by creating a palindromic DNA sequence in the promoter region of the ribosomal RNA cistron: the "structon", 573
Computer analysis of cell division in *Drosophilia* imaginal discs: Model revision and extension to simulate leg disc growth, 361
Convection and diffusion in tissue and tissue cultures, 777
CRIPPEN, G. M. and KUNTZ, I. D., Directional structural features of globular proteins, 47
Current developments in the investigation of the primary light reactions in photosynthesis (letter), 199
CURRY, G. L. (see SHARPE, P. J. H.), 21
Cycling cells, the labelled mitosis curve for a population consisting of fast and slowly, 63
CYRULNIK, R. (see ANNINOS, P. A.), 697

DARVEY, I. G., One-substrate-one product enzyme reactions: The determination of the velocity constants for an enzyme mechanism involving two conformational forms of enzyme and one enzyme intermediate, 655
DAVYDOV, A. S., Solitons and energy transfer along protein molecules, 379
DE MICHELE, D. W. (see SHARPE, P. J. H.), 21
Denaturation: An example of a catastrophe III, Phase diagrams for multistate transformations, 681
Depth perception, the plasticity of correspondence: After-effects, illusions and horopter shifts in, 203
Dihydrofolate-reductase receptor site by correlation with minimal topological (steric differences), mapping of, 485
Directional structural features of globular proteins, 47
Distribution model of organism development times, 21
DUCHESNE, J., A unifying biochemical theory of cancer, senescence and maximal life span, 137
DUNCAN, R. and PRATTEN, M. K., Membrane economics in endocytic systems, 729
Dynamic equilibrium under periodic peturbations in simple ecosystem models, 327

Ecosystem models, dynamic equilibrium under periodic perturbations in simple, 327
Ecosystems, the stability of, a finite-time approach, 345
EISEN, M. and SCHILLER, J., Microfluorometry analysis, 801
Electronic structure of established and potential oxidizing agents in biological systems, 461
Elementary treatment of the genetical theory of kin-selection, 541
Endocytic systems, membrane economics in, 729
Energy of association of uracil with Watson–Crik A-T pair, 39
ENGBERG, J. (see COLLINS, J.) 573

Enzyme reactions, one substrate-one product: the determination of the velocity constants for an enzyme mechanism involving two conformational forms of enzyme and one enzyme intermediate, 655
Epilepsey, a neural net model for, 697

Ferrohemoglobin, out-of-plane distortion of the iron in, due to pseudo-Jahn-Teller effect,13
Fibrillar pectin and contact cation exchange at the root surface, 527
FISHER, J. R. (see WELLS, B. D.), 81
FONG, F. K., Current developments in the investigation of the primary light reactions in photosynthesis (letter), 199
FRISCH, H. L. and GOTHAM III, I. J., On periodic algal cyclostat populations, 677

Gibbs phenomenon in the space domain, the Mach bands:, 195
GILL, W. N. (see RUCKENSTEIN), 147
Globular proteins, directional structrual features of, 47
Glutamate dehydrogenase, a kinetic model for, 81
GO, N. and ANAN, Y., Regulatory functions of allosteric enzymes in far-from-equilibrium systems, 475
GODFROID, J-J. (see WOLKOWSKI, Z. W.), 181
GOTHAM III, I. J. (see FRISCH, H. L.), 667
GRISELL, R. D., Models of potassium conduction in excitable membrane examined by spectral analysis, 399
Growth kinetics of platelet thrombi, 147
